

Information System AB

Measuring and counting

INDUSTRY

It is important to inform about what is happening in for example the production right now. Quality rate, productivity rate and production disorders is some of the things all co-workers has to know about if prescribed goals are to be fulfilled. Health and safety signs are a good way to work for better safety.

Our signs can operate as individual units or as parts in a network. We design the display completely after your desires.

SPORT AND RESULTS

To show the results in real time for a audience or to present winners or scores can nice and easily be done with our signs. Our signs can operate as individual units or as parts in a network. We design the display completely after your desires.
