

Information System AB

Public transports

In the area of real time passenger information displays we have a lot to offer, both individual units and integrate systems.

The signs are developed to operate as individual units or as parts in a network. We supply both a medium to show information and solutions for the customers to easily handle and update their information, for example with a cell phone.

RAIL SIGNS

Thanks to our signs people everyday can see when and from what platform the next train departures in the subway of Stockholm

POLTECH have 25 years of experience in the area, with customers such as Stockholm Metro, London Light Railway och Metro Helsingfors.

BUS STOP SIGNS

Through the years we have had a lot of pleased customers, such as Leicester City, Stockholm City, Oslo, Albany County och Berlin.
