

Information System AB

Road and traffic

HIGHWAY VMS

Our signs can be used to show all kind of information by the roads. Variable speed limit signs and warning signs, displays for road construction areas and traffic information etcetera. Everything is possible!

CITY BOARDS

A sign to show present information about events, happenings and other information about the municipality is the right way to inform passer-bys, tourists and locals. Furthermore all our signs are easy to update with new announcements.

PARKING

In a carpark it is important with signs showing were it is occupied or free spaces. Present fare, possible closing time, signposting and other information are also important to clearly show. We design our displays completely after your desires. We have also a special software built for carparks, handling a network of signs and counting cars.

GAS STATION SIGNS

On a gas station it is important to have a well functioning display showing present gas price. We offer such a sign, easy to update and clearly showing the information. Alternate between the different gas prices or have on line for each type of fuel. We design our displays completely after your desires.
